

EVGENII SVERDLOV

Available for Frontend / Product Engineer roles

Frontend / Product Engineer building complex, data-heavy web applications with React, Next.js and TypeScript. I work across product interfaces, API integration, authentication, asynchronous server state, testing and deployment, with additional experience in Go and hardware-connected systems. My product design background helps me turn complex requirements into clear, maintainable production interfaces.

SKILLS

Frontend

React · Next.js · TypeScript · TanStack Query · RTK Query · Tailwind CSS

Product Engineering

Data-heavy interfaces · Responsive UI · Component systems · Forms · Charts · Application states

Backend / Integration

Go · Node.js · Express · PostgreSQL · REST APIs · Docker

Interactive / Hardware

Three.js · React Three Fiber · GSAP · Raspberry Pi · BLE · ESP32

SELECTED EXPERIENCE

2024 - 2026

FRONTEND DEVELOPER

Arcanis Research

Fintech SaaS / Investment Research Platform

- Built and maintained a production React/TypeScript client portal spanning company discovery, research ordering, report access, secondary-market workflows and AI-assisted analysis.
- Implemented authenticated REST API integration, token refresh, protected routes, TanStack Query caching and resilient application states.
- Built reusable responsive product components and React-based report templates for server-side PDF generation with Puppeteer.

2016 - 2024

WEB & DIGITAL DESIGNER

Independent client work

Worked with international clients and businesses on web-facing digital products, landing pages, visual communication, UI layouts and product presentation. This experience now supports my frontend work through stronger UI judgment, layout discipline, client communication and product thinking.

Location:

Currently based in Russia

Open to:

Hybrid/Remote · Relocation

Languages:

English — professional working proficiency · Russian — native

Education:

Ural State University,
Master's degree in Marketing & Advertising.
Thesis: Branding for print media

Experience:

2+ years production frontend engineering
8+ years international design/client work

Focus:

Frontend · Product UI · Dashboards · Internal tools

SELECTED PROJECTS

Investment Research Portal

React · TypeScript · Vite · TanStack Query · Vitest / Playwright

- Production client portal spanning company discovery, research ordering, report access, secondary-market workflows and AI-assisted analysis
- Authenticated API integration, token refresh, caching, responsive product states and PDF report pipeline.

CASE STUDY ↗

RV Monitor

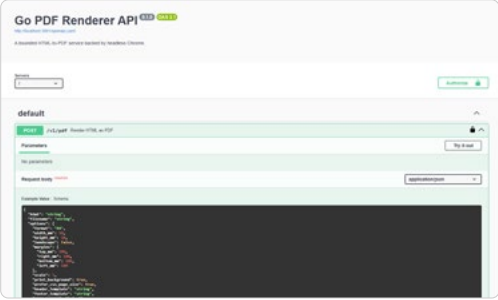

Next.js · Node.js · PostgreSQL · Prisma · Raspberry Pi · BLE · Docker

- Local-first monitoring system connecting vehicle hardware, telemetry, cameras and remote web access.
- Designed for stale data, reconnects and intermittent connectivity.

CASE STUDY ↗

Go PDF Renderer

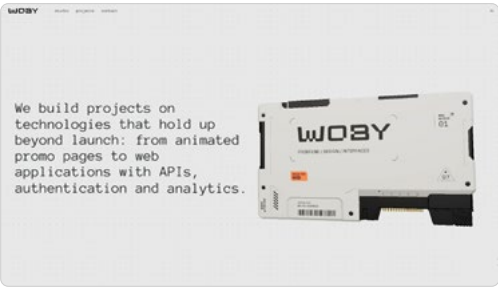

Go · chromedp · OpenAPI · Prometheus · Docker

- HTML-to-PDF HTTP service around long-lived headless Chrome.
- Bounded concurrency, strict input validation, deny-by-default networking and operational metrics.

CASE STUDY ↗

Woby

Next.js · TypeScript · Three.js / R3F · GSAP · GLSL

- Production website built around a scroll-driven 3D interface combining React, WebGL and synchronized DOM animation.
- Separated React application state from frame-by-frame Three.js/GSAP rendering, with responsive and reduced-motion fallbacks.

CASE STUDY ↗
